... Digital

what is HD?

It's the latest digital video technology that provides stunning pictures

High definition TV's offer the potential for gorgeous images, but to take full advantage of these screens you'll need a DVD player of equally high performance. The new Discmaster DVD player is unique, because it not only offers stunning high definition images with life-like colour, it also boasts astonishingly high definition audio quality. Cyrus' famous sound technology provides a superior audio experience for a captivating DVD performance.

Our systems can be specified to suit your needs. Whether you purchase a Discmaster and a set of our forthcoming LinkVox wireless speakers for the most compact AV system available, or something more exotic from our wider range of components to raise the performance to advanced home theatre standards, the new Discmaster will give you double HD ... high definition images and audio!

The matching AV Master is an optional and equally compact AV amp. Its upgrade options are numerous. However, like the Discmaster, it can be ordered as a single unit or part of a more advanced 7.1 high-end AV system. The choice is yours and, because it's part of the upgradeable Cyrus range of hi-fi components, you can change your mind later should you wish to expand your AV system in the future.

Discmaster 8.0

This compact, high performance DVD player is all you need to start a Cyrus HD system. High performance pictures for the latest flat screen TV's and high performance audio, plus the option to upgrade audio further with the addition of Cyrus' Qx DAC module.

AV Master 8.0

The matching AV Master offers comprehensive 7.1 surround sound performance. This flexible processor also incorporates three channels of power amplification, allowing easy integration into existing audio systems.

Cyrus Pre vs2, 8 vs2, 6 vs2 amplifiers

Our latest vs2 amplifier technology, which is built into all of our amplifiers, is the most advanced available. This is only one of the reasons why our award-winning amplifiers have been received so enthusiastically by the media. They are also highly-refined designs that offer amazing performance and value. Each is upgradeable within the wide range of components we offer, allowing you to choose a system that is exactly right for you now, or indeed, in the future as your desires evolve.

For twenty five years, Cyrus has been at the forefront of what is possible in home hi-fi systems and our affordable 6 Series is a terrific place to start your outstanding audio system. For the second year running, Cyrus has been awarded the ultimate accolade of overall 'CD Player of the Year' by *What Hi-Fi? Sound & Vision*. Our latest amplifiers have also received class-leading praise and so, the combination of a CD 6s and matching Cyrus 6 vs2 amplifier, offers you outstanding musical performances in your home.

Inside each modern, compact chassis, lives technology that is at the leading edge of what is possible in audio systems today.

DAB 8.0

Bristling with new technology, the new DAB 8.0 is a state-of-the-art digital radio, featuring a new menu system called Electronic Program Guide (EPG), allowing you to view live listings of future radio programs and record them while you're out and about. An SD card slot gives you the ability to add more memory for longer recording times. You can then listen to them later, even whilst on the move, if your 'portable' has an SD card option. Many other features, including pause and rewind, combine with outstanding

A major benefit of any Cyrus investment is its longevity and upgradeability.

Our components are designed, manufactured and supported in the UK. We can service components we sold twenty five years ago and regard our ability to maintain our products as a commitment to customer satisfaction. Lots of customers expand smaller systems purchased many years ago, possibly handing a cherished system to a younger generation or, for instance, investing in a new DVD player to expand an existing hi-fi system into a modern AV surround sound home cinema system.
