## Rotel Launches Flagship 15 Series

Two audiophile-quality AV Receivers incorporating Faroudja 1080p video processing, compatibility with the latest high-definition audio codecs and HDMI v1.3a connectivity with support for Deep Colour. A preamp-processor for Home Theatre enthusiasts. Four new Class D power amplifiers. Two power amps designed exclusively for Custom Installation.

The 15 Series takes Rotel's Home Theatre prowess to new levels. The brand's legendary audiophile-quality amplification is married to the latest AV processing technology and contained within stunning casework. These elements combine to produce the best sounding Home Theatre amplifiers Rotel has ever produced, and thanks to the latest HDMI connectivity and Faroudja processing, the receivers are capable of the highest levels of video output, too.

RSX-1560

The flagship RSX-1560 receiver features 7x100W of audiophile-quality Class D amplification. This isn't 'D' for digital, rather a high-quality analogue system that uses high-speed power supplies and conductors to eliminate the need to store energy, and instead allows the amplifiers to deliver power effortlessly. This is not only more efficient, but results in an amazingly dynamic and clear performance.

That breathtaking sound is backed up by 1080p/24Hz Faroudja video processing, four HDMI v1.3a inputs, support for Deep Colour and xvYCC next-generation video signals, and the ability to decode the latest high-definition audio codecs found on Blu-ray discs, including Dolby TrueHD, Dolby Digital Plus, dts-HD Master Audio and dts HD Hi-Resolution.

RSX-1550

The RSX-1550 also benefits from seven-channel audio and HD video processing, but swaps the Class D amplification for 5x75Watts of Class A/B power. This allows customers to get many of the benefits of the RSX-1560 but without the expense of extra channels of amplification they may never use. And if they do want to upgrade, the new 15 Series two-channel power amplifiers allow them to do so seamlessly.

RSP-1570

The RSP-1570 Surround Processor/Preamplifier shares features with the RSX-1560, but provides enthusiasts with the option of a two box Home Theatre solution. Faroudja video processing and HD audio decoding make the RSP-1570 a true high-definition hub, while the four HDMI v1.3 inputs provide excellent connection options.

RMB-1575

To partner the processor, or to add extra channels to the receivers, the 15 Series includes four Class D Home Theatre power amps. The RMB-1575 boasts an amazing 5x250Watts of amplification, while the RMB-1565 has 5x100Watts. There is also a pair of two-channel amps, the 2x250Watt RB-1572 and the 2x100Watt RB1562.

RMB-1506

The 15 Series also boasts two power amplifiers designed especially for the Custom Install arena. The RMB-1506 is a 6x60Watt Class A/B model, while the classy RB-1510 is a 2x65 Watt Class D model. Installer-friendly features include input busing, front-panel attenuation controls for each channel, buffered link outputs that maintain signal integrity, and the inclusion of both heavy-duty 5-way speaker outputs and screw-terminals for custom wiring.

The 15 Series products are available in silver or black, and all apart from the RSX-1550 are sized for the EIA "U" height standard for easy rack mounting.

And this isn't the end of the 15 Series story. 2009 will see the range expand to include a selection of two channel hi-fi products and accessories.

The new Rotel 15 Series components are available in December, and priced as follows:

<b>RSX-1550 Home Theatre Receiver</b>	£1395
<b>RSX-1560 Home Theatre Receiver</b>	£1895
<b>RSP-1570 Home Theatre Surround Pro/Pre</b>	£1395
<b>RMB-1565 - Five-Channel Home Theatre Power Amp</b>	£795
<b>RMB-1575 – Five -Channel Home Theatre Power Amp</b>	£1695
<b>RB-1562 - Two-Channel Home Theatre Power Amp</b>	£545
<b>RB-1572 - Two-Channel Home Theatre Power Amp</b>	£795
<b>RB-1510 – Two-Channel Installation Amplifier</b>	£350
<b>RMB-1506 - Six-Channel Installation Amplifier</b>	£595
