

REGA RESEARCH LTD

24v High performance motor upgrade kit

****AVAILABLE TO ORDER NOW****

This kit includes the low noise, low vibration 24v motor designed and developed for our range of multi award winning 24v turntables. Designed with a simple fixing solution to fit all previous Rega turntables that do not already use 24v technology.

Fits : **RP1 / P1 / P2 / P2 2000 / PLANET / PLANAR 2 / PLANAR 3 / P3 2000 / PLANAR 25**

Main Features

Individually hand tuned PCB to minimise vibration.
Rega designed 24v low vibration, low noise synchronous AC motor assembly.
Rigidly mounted to improve start up speed over previous suspended Planar models.
Guaranteed to improve drive, speed stability and sonic performance.

Optional upgrade path

Compatible with the Rega TT-PSU external power supply, which incorporates an advanced anti vibration circuit and offers even greater stability. The TT-PSU also has the added convenience of electronic speed change. Optimise performance with the Rega upgrade drive belt.

Although simple to fit we recommend this kit is fitted by a qualified Rega dealer to ensure maximum performance.
For use with Rega turntables only.
