THE D-M39(DAB) CD-RECEIVER SYSTEM IN A COMPACT CABINET OFFERS HIGH QUALITY AUDIO FROM A MULTITUDE OF SOURCES.

Now there's even more Denon in so little space: this micro component system has been continually developed to meet the needs of modern day audio fans. Besides its stunning stereo sound performance, this latest and refined model provides a digitally transmitted play function for iPhone / iPod / iPad via the front USB

terminal, which certainly is also open to connect to any other USB sound device. Other traditional source as CD, FM radio and in one version even the digital radio DAB are supported. For further expansion it offers a digital input so TV screens or set-top boxes can be connected easily to improve audio quality significantly.

FEEL IT

“Simple & Straight” circuit design for sound purity and free of coloration

Denon’s popular M series gives you high sound quality based on the “simple & straight” concept. Circuitry is uncomplicated, signal paths are short, and all adverse influences on sound quality have been minimised. The circuit design and the way the chassis is built ensure that the sound you hear is utterly faithful to the original performance.

Triple noise reduction design to preserve signal purity

In an audio component where various circuits, boards, and wire layouts can influence each other, it is not possible to obtain satisfying specifications or sound simply by strengthening the power amp circuit. Denon has therefore eliminated three sources of noise to ensure that the sound is as clean as possible. Distortion from the input selector, electronic volume and power amp has been suppressed to improve the signal-to-noise ratio and produce an even smoother, dramatic sound.

NEW FEATURES

- New cosmetic design
- Digitally transmitted audio from iPod, iPhone and iPad (via USB) for best sound quality
- “Simple & Straight” circuit design minimizing distortion from the input selector, electronic volume and power amp for sound purity and free of coloration
- Triple Noise Reduction Design (T.N.R.D.) to preserve signal purity
- Digital input for Digital gear for upgrading the sound of your Apple AirPort Express, or your TV set
- Speaker Optimizer circuit for high quality sound with SC-M39 speaker system
- Easy-to-use remote control handset

Direct play for iPod, iPhone and iPad via USB

You can also listen to music files from your iPod by simply connecting it to the USB port with the USB cable that came with the iPod. Digital signals from the iPod are transmitted as is to the D-M39 and are processed by advanced audio circuitry to produce a clean, high-quality sound.

Enjoy premium sound in your home office, bedroom, or any other room

The D-M39’s compact size of 210 mm width and 310 mm depth lets you easily set the system up on a bookshelf or in a bedroom. With both beautiful sound and appearance, this high-class audio system easily blends into your daily life.
