

Key features of the Akorner Reference

Clean Lines

The Top level has no holes on the surface, leaving elegant clean finish

Any Size

As we make all our racks, you can have them in any width, depth or height to meet you're requirements

Leg Length

The Leg length is the size of the opening, including the spike

Removable Legs

All legs are removable, meaning they can go on any level or be removed and replaced for future expansion

Measurements

To calculate internal width deduct 112mm from the external size

Spikes & Discs

Spikes come with every tier and locating discs are supplied for the base level

Max Load

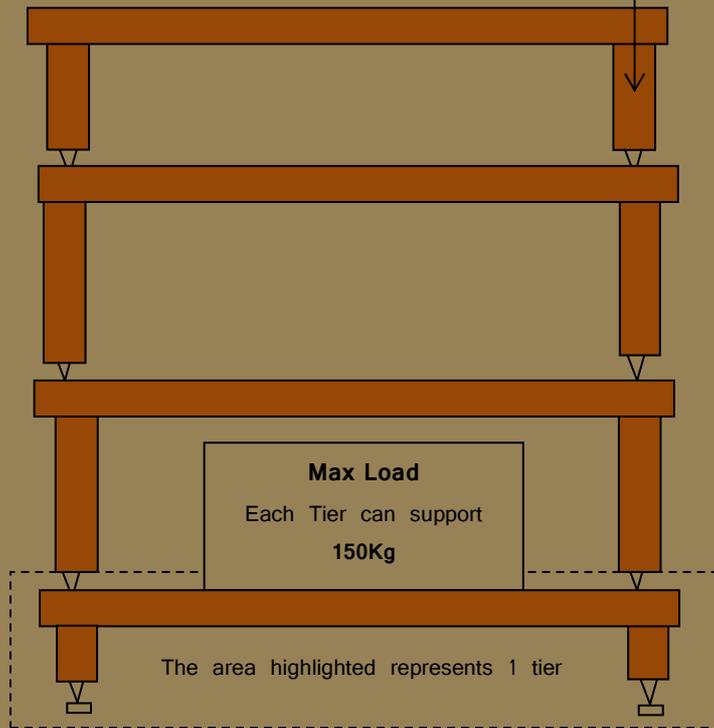

Each Tier can support 150Kg

No Extra Cost

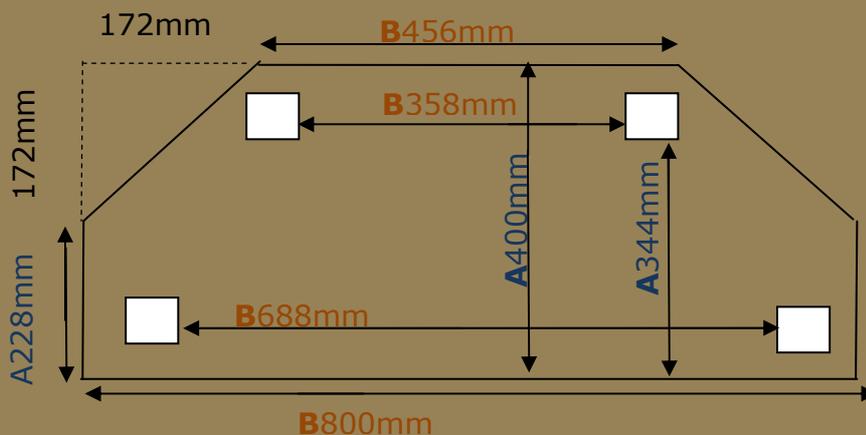

You can have any leg length for no extra cost.

Solid Hardwood

We only use solid Hardwood in construction, offering the best aesthetics and acoustic performance

Akorner XL Bespoke Calculator

If you want to increase or decrease the overall depth (A) or width (B), then all other A & B measurements will increase or decrease by the same amount.
