Dimensions (W x H x D): 1000mm x 90mm x 142mm

Height Including feet: 105mm

Weight: 4.9kg

The Q Acoustics M4 features 'BMR' driver units. These innovative speakers create clear room filling sound. An acoustically matched built-in high performance subwoofer adds real bass. You will enjoy a 'cinema' audio experience with the Q M4 compared with using the TV speakers alone.

The Q M4 is a 'Hi-Fi soundbar', designed to play music and movies with equal accomplishment.

With both analogue and optical inputs the unit can also be used with a variety of other entertainment sources such as games consoles, Blu-ray, CD and portable music players.

The unit is also Bluetooth compatible using aptX lossless Bluetooth for audio streaming. This wireless connection can sync to almost any Bluetooth compatible audio device. It can remember up to eight pairings, so when friends or family come over, a 'guest' music player can get connected in just seconds. The aptX Bluetooth we use is V4.0 and is compatible with the V3.0, V2.1, V2.0 even V1.2, so will work with older devices.
