Music means a lot to you. It is not only part of your life, it is a part of you. It's critical to you to hear all the nuances and subtleties woven into your favourite music that make listening such a satisfying and emotional experience.

So, it is safe to say that Sennheiser and you are striving for the same thing: The perfect sound. For decades now, Sennheiser has been pushing the boundaries of what a pair of headphones can possibly convey.

Drawing on over 70 years of audio expertise in live sound recording and reproduction, we have proven time and time again that we can challenge your hearing, giving you an experience in sound that you have never had before. Enter the world of high-end audio and reshape your whole definition of listening.

WHAT IS CLUB ORPHEUS?

Club Orpheus is a network of around 30 handpicked high-end audio dealers in the UK and Ireland that offers a range of exclusive benefits to their customers.

The name Club Orpheus is derived from the world's most expensive headphones developed by Sennheiser in the early 1990s, when Sennheiser set out on a mission to design the best headphones ever, irrespective of time taken and overall cost. So, we created the Orpheus, which became a legend. Only 300 systems were ever made and quickly sold to music lovers all around the world.

In recognition of this ground-breaking success, we established Club Orpheus in the UK in 2012 to ensure our high-end range could only be sold through approved dealers able to offer their customers a personal demonstration and listening experience worthy of Sennheiser's ambitions.

WHY BUY FROM A CLUB ORPHEUS MEMBER?

- Earlier access to new audiophile headphones that launch exclusively with these dealers first
- Confidence that you are buying from an approved Sennheiser specialist
- Extended warranties on selected products within the Club Orpheus range
- First-class dedicated customer service – from the dealer and from Sennheiser directly
- Guaranteed availability of all Club Orpheus products in-store at each of the approved dealers
- Demonstration facilities with unparalleled product expertise

ADDITIONAL FEATURES OF THE HD 800 S VS THE HD 800

- Further optimised reference class in wired headphones
- Absorber technology
- Additional balanced cable with XLR4 connector
- High-class matt black metal design

FEATURES

- Open, around-ear, dynamic stereo headphones
- A realistic and natural sound field with minimal resonance
- The biggest transducers ever used in headphones
- Uncovered ear cups for pure natural sound
- Handcrafted, microfibre ear pads
- Metal headband with inner damping element
- Specially tuned symmetrical, impedance-matching cable with low capacitance
- High-precision headphone connectors
- Exclusive 10-year Club Orpheus warranty

HD 800 S HIGH RESOLUTION HEADPHONES

The HD 800 S represent everything there is to love about the HD 800, and then some.

Featuring a striking matt-black industrial look that seamlessly unites design and function. An innovative combination of advanced materials such as layered metal to eliminate vibrations and improve sound.

But the soul of the HD 800 S lies in its highly refined details, including for example, the additional connection cable. An XLR-4 balanced cable made of silver-coated oxygen-free copper strains for minimum resistance, fitted with gold-plated contacts. More fully enjoy the outstanding quality of sources with balanced outputs such as the Sennheiser HDVD 800 headphone amplifier. Furthermore, the HD 800 S feature a new technology...

INNOVATIVE ABSORBER TECHNOLOGY

The enhanced sound reproduction of the HD 800 S is achieved through the addition of the absorber technology. A breakthrough that preserves the audibility of very high frequency sounds by eliminating a phenomenon known as the "masking effect", where high frequencies are rendered inaudible by lower frequencies of a higher volume. By absorbing the energy of the resonance, Sennheiser's patented technology prevents unwanted peaks and allows the finest nuances to become audible.

HD 800 ORIGINAL CLASSIC HIGH-END

Our dream was to create an acoustic experience more incredible than anything ever heard through dynamic headphones. And we did it – no other manufacturer has been able to come as close as the HD 800 in replicating the complex acoustic conditions of natural hearing.

For its outstanding performance, the HD 800 is the headphone of choice for artists and producers, such as George Michael. Premium engineering and a visually striking design have been combined to create a glorious success that has become a true pioneer in headphone development.

The HD 800 – crafted for perfection.

FEATURES

- Open, around-ear, dynamic stereo headphones
- A realistic and natural sound field with minimal resonance
- The biggest transducers ever used in headphones
- Uncovered ear cups for pure natural sound
- Handcrafted, microfibre ear pads
- Metal headband with inner damping element
- Specially tuned symmetrical, impedance-matching cable with low capacitance
- High-precision headphone connectors
- Exclusive 10-year Club Orpheus warranty

Upgrade balanced XLR connection cable for HD 800, optimally matched to the HDVD 800 headphone amplifier

- Balanced sound output for cleaner background and improved stereo separation
- Highest quality materials – oxygen free copper, silver and gold plate with sturdy connectors
- An essential part of the system – where the smallest differences to your sound are really worth hearing

HDVD 800 HEADPHONE AMPLIFIER

With the HDVD 800 digital amplifier you will get the most from your high-end headphones. Fully symmetrical signal processing and extremely low harmonic distortion allow for pure, unbeatable listening enjoyment.

Its outstanding features include a balanced sound image, maximum precision and impressive spatiality. The high-end digital-to-analogue converter with built-in jitter reduction system, allows for the connection and processing of digital sources at the highest possible quality. Every component was evaluated in listening tests before the optimum combination was finally chosen.

For a truly perfected sound.

FEATURES

- Symmetrical signal processing with exact signal transmission over the entire frequency spectrum
- Very low harmonic distortion
- Operation with up to four dynamic, high-impedance headphones
- High transmission bandwidth and signal fidelity due to short signal paths
- Symmetrical XLR-4 sockets and high-quality 6.35mm jack sockets for connecting headphones
- High level of flexibility with a wide range of connection options
- Exclusive 5-year Club Orpheus warranty

IE 800 EXTRAORDINARY AWARD-WINNING EAR-CANALS

Brimming with technology and designed with your comfort in mind, the IE 800 contains more innovations than any other in-ear system, allowing music lovers to enjoy perfect sound, even when they're on the move.

Ground breaking technology, such as the perfected single-channel transducer system, innovative resonators and ergonomic ear adapters, ensures that unlike some other in-ear headphones, music is played back with crystal clarity and absolute time precision. Features include high-quality ceramic housings, Kevlar reinforced cables and a dynamic linear-phase driver with an extra-wide band (XWB).

So, what makes the IE 800 so special? It has no masking effect due to its unique technology, better high-frequency response, no phase distortion, less THD and a better fit than other in-ear headphones.

The IE 800 truly is an outstanding in-ear system.

FEATURES

- Dynamic linear-phase driver with an extra-wide band (XWB)
- Kevlar reinforced cables with robust and aesthetic ceramic ear housings
- Very low harmonic distortion
- Extra comfortable, biocompatible ear cushions with both round and oval designs
- Patented dampened, twin-chamber absorber (D2CA)
- Deep, distortion-free bass
- Engineered and handcrafted in Germany
- Standard 2-year warranty applies

HD 630VB HIGH-END PORTABLE HEADSET

Leaving the house wearing your treasured high-definition home stereo headphones has never been an option? Well, now it is! Enter the closed, around-ear Sennheiser HD 630VB.

Audiophile in every aspect but tough enough to go wherever you take it. Featuring cutting-edge transducers with a frequency response of 10 to 42,000 Hz and the legendary Sennheiser passion for truth in sound. Its collapsible design made of sturdy, high-quality materials takes on all challenges of the 'on-the-go' lifestyle. So, stop leaving your audiophile sound at home.

Start wearing the Sennheiser HD 630VB – and take it with you.

FEATURES

- Closed around-ear audiophile headphone, with collapsible design for maximum portability
- Premium metal construction, with real aluminium ear cups, yokes and sliders
- Balanced, audiophile sound
- Rotary bass dial for customising the bass response
- Integrated remote controls on the ear cup to control music and taking calls via the inline microphone
- Removable and exchangeable ear pads
- Exclusive 5-year Club Orpheus warranty
